

wash mitts based on unique moisturising agents, mild surfactants and octenidine

octenisan™ wash mitts

Our plus - Your benefits

- Free from colors & perfumes
- Suitable for bedridden patients
- Tested as per European standards (EN) for its efficacy

Applications

- For whole body washing independent of washing facilities
- Especially suitable for washing of immobile persons in need of care and bedridden patients on Intensive Care Units (ICU)
- Cleaning and care of skin
- For germicidal whole body washing

Direction for use

Open cautiously the soft pack & take out an octenisan™ wash mitt as required. Clean the skin and leave the impregnation solution on for at least 30 seconds. Make sure the skin is completely moistened, especially in the area of the armpits, areas between the fingers and between the toes as well as other skin folds. Rinsing afterwards with water is not necessary. octenisan™ wash mitts are also suitable for washing hair. octenisan™ wash mitts should be used only for a limited period of time, e.g. in the scope of sanitation procedures.

Precaution & Contraindications

Do not apply if allergies to one of the ingredients are known or suspected. Do not use in combination with anionic surfactants as they can affect germicidal cleaning. Do not use in combination with products containing PVP-iodine. octenisan™ wash mitts must not be mixed either with other soaps, ointments, oils, enzymes, etc.

- Performance of octenidine molecule
- Gentle care
- No secondary rinsing required
